Portfolio | GitHub

Professional Summary

Computer Science and Engineering graduate focused on backend development, DevOps, and data analytics with ML engineering. Builds and deploys web applications using Node.js, Express.js, relational and NoSQL databases. Familiar with authentication, caching, and cloud deployment, with a foundation in Python, data preprocessing, and machine learning.

Experience

Research Assistant (Internship), ELITE Research Lab LLC Remote, Queens, NY, USA. Areas: Computer Vision, LLM, VLM.	Sep 2026–Present
Back End Developer (Internship), Vyren Remote, Germany.	Sep 2026–Present
Backend AI Engineer – Intern, FlyRank AI Remote.	Sep 2026–Present

Technical Skills

Backend-Focused	DevOps	Data Analytics with ML Engineering
Node.js, Express.js, TypeScript and Nest.js. REST API development, PostgreSQL, MongoDB and MySQL. Redis caching, JWT and email authentication. Database design and transactions. Load-balancing concepts, system design fundamentals and scalable backends. API security and optimization.	Git and GitHub. Linux, Docker, CI/CD and AWS fundamentals. Vercel, Render, Firebase and Cloudinary. Environment configuration and application deployment. Logging and monitoring concepts, basic server management and deployment troubleshooting.	Python, NumPy and pandas basics. Data cleaning, missing values, filtering and groupby. CSV/Excel data handling, Matplotlib charts and exploratory data analysis. SQL joins and aggregation, basic descriptive statistics. ML, deep learning, computer vision, NLP, VLMs and LLMs. Data preprocessing, model evaluation, PyTorch and TensorFlow. Fine-tuning concepts, prompt engineering and Responsible AI.
Programming Languages	JavaScript, TypeScript, Python, C++, SQL, MATLAB, Java, and PHP (basic)	
CS Fundamentals	DSA, Object-Oriented Programming, Operating Systems, Computer Networks, Computer Architecture, Database Management Systems, and Software Engineering	
Development Tools	VS Code, Jupyter Notebook, Postman, GitHub, XAMPP, database management tools	
Problem Solving	Solved 200+ problems on Codeforces, LeetCode, and other online problem-solving platforms	
Self-study Topics	Node/Express routing, middleware, sessions and testing. Cloud service models, virtualization, migration, security and SLA management. Agile, CI/CD, build and deployment automation. Excel formulas and pivot tables, NumPy, pandas, Matplotlib, data cleaning and visualization.	

Education

B.Sc. in Computer Science and Engineering Ahsanullah University of Science and Technology (AUST), Dhaka CGPA in Last Four Semesters: 3.65/4.00	Graduated 2026 CGPA: 3.32/4.00
Higher Secondary Certificate (HSC) , Chittagong College	2020 GPA: 5.00/5.00
Secondary School Certificate (SSC) , Saint Placid's High School	2018 GPA: 5.00/5.00

Development Projects

CommerceX – AI-Powered Multi-Vendor Marketplace Stack: Node.js, PostgreSQL, Redis, Socket.IO, React, Vite, Docker and Cloudinary Demonstrates complete e-commerce workflows, REST API design, inventory handling, and real-time communication.	GitHub Live Website
--	-----------------------

- Built customer, seller, and administrator workflows with JWT authentication, role-based access, product variants, checkout, order fulfilment, reviews, and shipment tracking.
- Used transactional stock updates and Redis caching for reliable inventory, with Socket.IO for real-time admin–seller messaging.

Dhaka Tesla Pool – Shared Ride Platform

GitHub | Live Website

Stack: React.js, Vite, Node.js, Express.js, MongoDB Atlas, Socket.IO, JWT, Cloudinary and Docker

Demonstrates route-matching algorithms, seat- and distance-based fare calculation, and real-time ride updates.

- Built a ride-sharing system that groups passengers travelling along compatible routes and calculates individual fares from shared distance and booked seats.
- Used Socket.IO for live communication and REST APIs for passenger, ride, authentication, and media workflows.

Stremars – YouTube-Style Video Sharing Platform

GitHub | Live Website

Stack: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, Cloudinary, Multer and JWT

Demonstrates large media-file handling, secure uploads, and the data flow behind a video-sharing platform.

- Implemented video upload, viewing, search, comments, likes, subscriptions, watch history, creator profiles, and community posts.
- Used Multer and Cloudinary to manage videos, thumbnails, avatars, and cover images while storing metadata in MongoDB.

Hotel Management System

- Built user authentication, room management, reservations, payments, inquiries, and administrative features.
- Designed a relational MySQL database with foreign-key constraints and transaction-based booking operations.

Training & Certifications

- **OpenCV University:** [Python For Beginners](#), [PyTorch Bootcamp](#), [TensorFlow-Keras Bootcamp](#), [VLM Bootcamp](#). 2025–2026
- **Google Cloud Skills Boost:** [Prompt Design in Vertex AI](#), [Introduction to Responsible AI](#), [Responsible AI: Applying AI Principles](#), [Introduction to LLMs](#), [Introduction to Generative AI](#), [Professional ML Engineer Study Guide](#). 2025–2026
- **MathWorks:** [MATLAB Onramp](#), [Machine Learning Onramp](#) and [Deep Learning Onramp](#). 2026
- **IBM/Coursera:** [Introduction to Data Engineering](#). February 2026

Additional Information

Languages	Bengali – Native, English – Intermediate (B1)
Strengths	Backend-focused problem-solving, quick learning, teamwork, technical documentation, adaptability, and attention to detail
Target Roles	Backend Developer, Node.js Developer, Software Engineer, Junior DevOps Engineer, Data Analyst, and ML Engineer
