Career Objective

Computer Science student passionate about Artificial Intelligence, Machine Learning, and Full-Stack Web Development. Focused on building scalable, data-driven systems and contributing to impactful research and real-world software solutions.

Education

B.Sc. in Computer Science and Engineering (CSE)

Ahsanullah University of Science and Technology (AUST)

CGPA: 3.30 / 4.00 | Expected Graduation: 2025

Higher Secondary Certificate (HSC)

Chittagong College | GPA: 5.00 / 5.00

Secondary School Certificate (SSC)

Saint Placid's High School | GPA: 5.00 / 5.00

Technical Skills

Programming: C++, Java (basic), JavaScript, Python, OOP, DSA, Algorithm Design

AI / ML /DL: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch

Web Development: Next.js, React.js, Tailwind CSS, HTML, CSS, JavaScript, Node.js, MongoDB, PHP

Database & DevOps: MySQL, MongoDB, Docker (basic), Git, GitHub, AWS/Firebase (basic)

Systems & Networking: Operating Systems, Computer Networks, System Design

Tools: VS Code, Linux, Jupyter Notebook

Soft Skills: Problem-solving, teamwork, communication, documentation, adaptability

Projects

SmartWasteBin – IoT, CNN, Blockchain, Edge AI, Firebase

Developed an Edge-AI-based waste bin with CNN waste detection, blockchain-based record logging, and Firebase cloud integration.

Computer Graphics Using WebGL

Created a 3D interactive scene with lighting, animation, and glTF model rendering using JavaScript and WebGL.

SentimentSphere – Sentiment Analysis System

Built a sentiment analysis system using Logistic Regression and NLP for large-scale e-commerce reviews.

Hotel Management System

Developed a hotel booking website using PHP and MySQL with user authentication and dynamic reservation.

Paira-A – Messenger Application

Designed a local-network chat application using Java Socket Programming for real-time text communication.

2D RPG Game (Java Swing)

Developed a 2D RPG game featuring player interaction, collision detection, and custom graphics.

iGraphics Game Project

Created a 2D animated game in C++ using iGraphics library with interactive gameplay and effects.

Achievements & Activities

- Solved 200+ problems on online platforms
- Regular participant in programming contests focusing on DSA

Additional Information

Languages: English (Fluent), Bengali (Native)

Strengths: Problem-solving, adaptability, teamwork, continuous learning

Interests: AI research, full-stack development, graphics programming, algorithms
