Career Objective

CS graduate focused on backend development, data engineering, and data science. Experienced in building scalable Node.js services, data pipelines, and analytical applications. Strong foundation in DSA, system design, and database management.

Education

B.Sc. in Computer Science and Engineering (CSE)

Ahsanullah University of Science and Technology (AUST)

CGPA: 3.32 / 4.00

Graduated: 2025

Higher Secondary Certificate (HSC)

Chittagong College

GPA: 5.00 / 5.00

Graduated: 2020

Secondary School Certificate (SSC)

Saint Placid's High School

GPA: 5.00 / 5.00

Graduated: 2018

Projects

1. BlogApp

Jan 2026

Built a backend-focused Blog Application demonstrating real-world backend development practices. The project implements full CRUD operations, middleware-based authentication, and protected routes, with EJS used for server-side rendering.

Hosted the application on AWS, ensuring scalable and reliable cloud deployment. Applied MVC architecture, authorization, and cloud database integration (MongoDB Atlas) to build a production-ready backend.

2. SmartWasteBin — Edge AI, IoT, CNN, Blockchain

Sep 2025

Developed an intelligent waste management system using CNN-based waste classification on edge devices, blockchain-based immutable logging, and Firebase cloud synchronization for real-time monitoring and analytics.

3. SentimentSphere — Sentiment Analysis System

Apr 2025

GitHub Repository

Built a large-scale sentiment analysis pipeline for e-commerce reviews using Logistic Regression and NLP techniques.

- Binary sentiment classification (positive / negative)
- Web scraping using BeautifulSoup and Requests
- Text preprocessing including stopword removal, stemming, and noise handling
- Model evaluation using accuracy, precision, recall, and F1-score

4. Paira-A — Messenger Application

Jan 2025

GitHub Repository

Designed a real-time chat application using Java Socket Programming and Firebase backend.

- Real-time messaging and user authentication
- Media sharing with secure Firebase storage
- Scalable architecture designed for future expansion

5. Hotel Management System

Jul 2024

GitHub Repository

Developed a dynamic hotel booking platform using PHP and MySQL.

- Secure user authentication and reservation management
- Responsive UI using Bootstrap
- Server-side processing with PHP and MySQL database

Technical Skills

Programming & DSA: C++, Python, JavaScript, Java (basic), Object-Oriented Programming, Data Structures, Algorithms

Backend Development: Node.js, Express.js, REST APIs, Firebase, MongoDB, MySQL, PHP (basic), .Net

Data Engineering & Analytics: ETL, Data Pipelines, Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, PyTorch

DevOps & Tools: Git, GitHub, Docker (basic), AWS / Firebase, Linux, VS Code, Jupyter Notebook

Systems & Concepts: Operating Systems, Computer Networks, System Design

Achievements & Activities

Solved 200+ problems on competitive programming platforms.

Regular participant in programming contests with a strong focus on data structures and algorithms.

Certifications

- **Introduction to Data Engineering**, IBM — Feb 2026
Certificate: [View Certificate](#)
- **Build a Free Website with WordPress**, Coursera — Feb 2026
Certificate: [View Certificate](#)
- **Professional Networking for Career Growth**, HP LIFE, Mission 44, Miami EdTech — Jan 2026
Certificate: [View Certificate](#)
- **Responsible AI: Applying AI Principles**, Google Cloud — Jan 2026
Certificate: [\(badge/link if available\)](#)
- **Prompt Design in Vertex AI**, Google Cloud — Jan 2026
Certificate: [\(badge/link if available\)](#)
- **Introduction to Responsible AI**, Google Cloud — Jul 2025
Certificate: [\(badge/link if available\)](#)
- **Introduction to Large Language Models**, Google Cloud — Jul 2025
Certificate: [\(badge/link if available\)](#)
- **Introduction to Generative AI**, Google Cloud — Jun 2025
Certificate: [\(badge/link if available\)](#)

Additional Information

Languages: English (Fluent), Bengali (Native)

Strengths: Problem-solving, adaptability, teamwork, documentation, continuous learning

Interests: AI research, full-stack development, graphics programming, algorithms
